Sales Data Analysis Dashboard using Microsoft Excel

Project Overview:

This project focuses on analysing sales performance and business trends using Microsoft Excel. The objective of the project is to transform raw sales data into meaningful insights through an interactive dashboard. The dashboard helps in understanding overall sales performance, profit trends, regional sales contribution, and product category performance.
By using data visualization techniques and analytical tools in Excel, the project demonstrates how businesses can monitor performance and make data-driven decisions effectively.

Tools & Technologies Used:

- Microsoft Excel
- Pivot Tables
- Pivot Charts
- Data Cleaning Techniques
- Slicers and Filters
- Data Visualization

Dataset Description:

The dataset used in this project contains sales-related information of a retail business. The dataset includes multiple attributes that help analyse business performance and customer behaviour.

Key fields available in the dataset:

- Order Date
- Sales Amount
- Profit

- Product Category
- Region
- Customer Segment
- Quantity Sold

Dashboard Features:

The Sales Dashboard was designed to provide a clear and interactive view of business performance. The dashboard includes the following features:

- KPI indicators such as Total Sales, Total Profit, Profit Percentage, Units Sold
- Year-wise sales and profit analysis to understand growth over time
- Monthly sales performance analysis to track trends and fluctuations
- Sales and profit comparison across product categories
- Region-wise sales contribution analysis
- Identification of top-selling products
- Customer segment analysis (Consumer, Corporate, Home Office)
- Interactive filters using slicers for years and months to explore data dynamically

Key Insights:

From the analysis performed in the dashboard, several important insights were observed:

- Sales performance increased steadily over the years from 2018 to 2021.
- The Consumer segment generated the highest share of sales compared to other customer segments.
- The West region contributed a significant portion of overall revenue.
- Technology category recorded the highest sales value among product categories.
- Monthly sales analysis helped identify peak sales periods during the year.

Skills Demonstrated:

This project helped in developing and demonstrating the following skills:

- Data Analysis
- Dashboard Development
- Microsoft Excel Analytics
- Data Visualization
- Business Intelligence Reporting
- Data Cleaning and Data Preparation
